

YASH Joins BEA Partner Program

November 17th, 2004 (Silicon India) - BANGALORE: YASH Technologies Inc. a US based company with a development center in Hyderabad, today announced that it has joined the list of companies in BEA Systems (BEAS) Partner Program.

YASH plans to develop a BEA practice focused on BEA WebLogic Portals and BEA WebLogic Integration that will be designed to provide its clients in India and US with a rapid deployment portal framework that can help them to enjoy the benefits of service oriented architecture (SOA) offered by BEA.

YASH offers ERP, EAI, QA, BI, eBusiness, Data Warehousing solutions using Synchronized Delivery through its development centers in Illinois, Virginia, Texas and Massachusetts in USA, Hyderabad and Indore in India. YASH is expanding its operations in India.

"YASH has teamed up with BEA to provide leading application infrastructure solutions to its clients. YASH plans to utilize BEA technology to provide its customers with solutions which are designed to help reduce the cost and complexity of business integration and realize faster time-to-value", said Hari Vyakarnam, Vice President, YASH Technologies Inc.

Manoj Baheti, CEO, YASH Technologies Inc. said, Our relationship with BEA spans over 4 years, and we have successfully executed many projects using BEA products in the US. Our BEA practice in Indore and Hyderabad is focused on building competencies in BEA WebLogic Platform 8.1, utilizing BEA WebLogic Portals and Integration software to leverage deployment of best in class solutions. We are in the process of ramping existing BEA practice strength with additional certified consultants.
