Hack2Build Winner

SAP

Seamlessly customize, innovate and integrate your IT landscape by harnessing the SAP Business Technology Platform

*By 2024, Low-code application development will be responsible for more than **65%** of application development activity*

- Gartner, 2021

*The average enterprise has 900 applications, and only **29%** of those are connected to each other*

- Mulesoft, 2022

***69%** of routine work currently done by managers will be fully automated by 2024*

- Gartner, 2020

Service Overview

Integrations

- Connect applications and processes across the ERP landscape seamlessly via thousands of pre-built APIs and hundreds of connectors to a diverse set of third-party applications
- Manage connections across different types of protocols for several end-points. Apply process logic to effortlessly route data among these end-points
- Integrate data from databases stored in hybrid storage environments

Extensions & Application Development

- Develop new applications with Pro-code, Low-code, or No-code approaches using tools like Business Application Studio, AppGyver, Mendix, etc.
- Create extensions of SAP Applications in Cloud Foundry, ABAP, and Kyma environments
- Unified FIORI-based UX for all extensions
- Cloud-based developer tools like Application Autoscaler, Cloud Transport Management, SAP Solution Lifecycle Management, etc.

Intelligent Technologies

- Simplify, automate and speed up business processes intelligently with No Code capabilities of SAP Process Automation
- Build AI-powered chatbots across your applications to enhance experiences
- Create Intelligent application functions with pre-designed AI models
- Manage workflows and process designs with Business Process Improvement
- Add Contextual Awareness in business processes with Qualtrics XM

Data and Analytics

- Leverage the Planning, Business Intelligence, and Predictive capabilities of SAP Analytics Cloud to extract value from data resources
- Aggregate data from disparate sources via SAP Warehouse Management Cloud
- Accelerate data operations using SAP HANA's in-memory capabilities. Combine transactional and analytical data with HANA's HTAP technology
- Create rich, interactive, and customizable dashboards for Business Intelligence

Value Proposition

- YASH leverages its end-to-end capabilities across SAP, Digital, Infrastructure, and Cloud Services to enable organizations to maximize value from SAP BTP
- YASH has extensive expertise in designing micro-apps and micro-services to add business-specific functionalities for extended applications
- End-to-end lifecycle management of APIs and connectors (design, activate, manage, and upgrade) for sustained integration across enterprise resources

- Reduce DevOps Cycle time by 65% and overall application development efforts by 50%
- Maximize adoption and integration of analytics and planning solutions across business functions
- 30+ pre-designed SAP BTP accelerators contextualized to different business scenarios
- Continuous value generation via support services tailored to business needs
