

More than what you think.

Taking the finance first approach for your SAP S/4HANA journey with Central Finance

60%

of traditional finance tasks are now automated

75%

said their organizations' long-term plans included either consolidating ERP instances onto one instance of SAP S/4HANA or deploying SAP's Central Finance

43%

said that multiple financial systems and ERP instances require integration and harmonization

A SAP Central Finance system, integrated real-time with SAP or non-SAP legacy source systems, is a non-disruptive path to an innovative and intelligent enterprise S/4 deployment. Large enterprise clients have successfully deployed SAP Central Finance to address multiple business requirements and drive value:

- Data harmonization, information standardization
- Finance transformation, enterprise digitalization
- Application / interface rationalization, decommissioning
- Moving to the cloud / leveraging the cloud (HCP)
- System consolidation, same-system transactions, and reporting
- Integrated planning, consolidation, transactions, reporting (4 in 1)
- Process centralization (shared services), re-organizations, M&A
- Zero-touch finance, exception-based finance management

Solution Offerings
