# RISE with SAP PCE

## A comprehensive Enterprise Transformation approach

**Recent SAP surveys on RISE with SAP are revealing**

*Customers realize **20%** lower TCO than traditional on-premises ERP solutions*

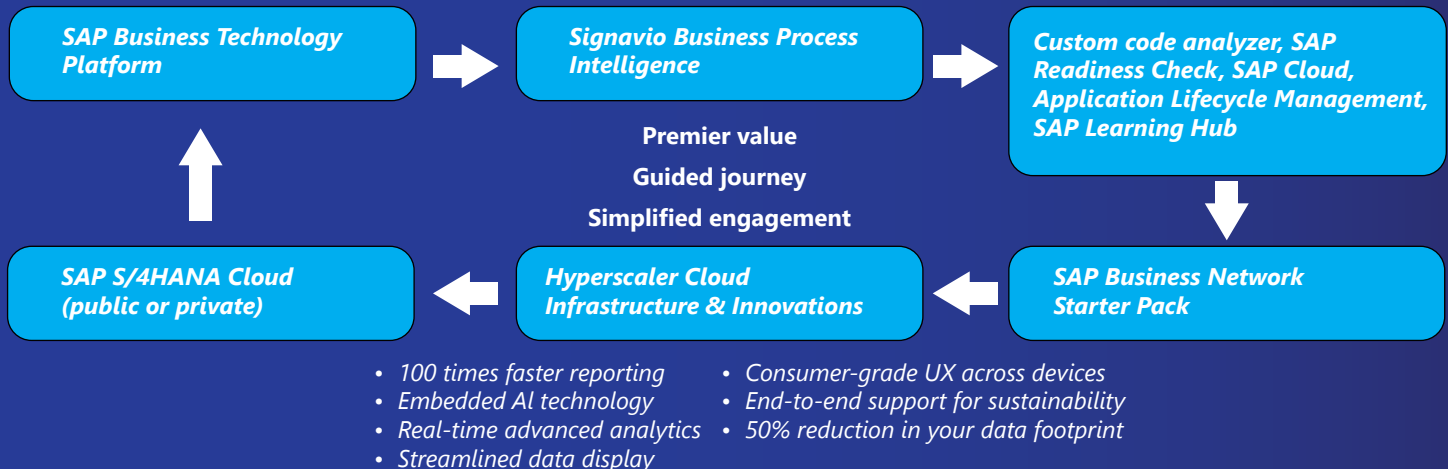

***43%** are looking to build out a modern IT infrastructure to lower costs and simplify business processes*

## What is RISE with SAP?

RISE with SAP is a “transformation as a service” approach that allows customers to access SAP Cloud solutions and run their SAP S/4HANA as the foundation for their business on a hyperscaler of their choice while leveraging systems integration partners to implement, manage and drive intelligent enterprise transformation.

## RISE with SAP Components

The bundle offers the below key components for customers to build an Intelligent Enterprise.

**SAP Business Technology Platform (SAP BTP)** is an integral part of **RISE with SAP**, allowing organizations to extend their S/4HANA solution with ease and integrate with other solutions (SAP, partner, or third-party), both on the Cloud and on-premise. Moreover, quite a few other intelligent technologies are available, from SAC, iRPA, Process Automation, Low-code/No-code, etc., for automating processes and driving business agility.

## YASH Services for RISE with SAP

- YASH is a PE Sell and PE Services SAP Partner for RISE with SAP
- On-prem SAP ECC conversions to RISE with SAP S/4HANA
- BTP implementation – Extension Suite, Integration Suite, SAC, Process Automation, etc.

## Value Proposition

- **Implementation Services:** As one of the largest SAP providers with more than two decades of experience helping customers transform themselves, YASH provides various implementation services in all S/4HANA pathways. Leveraging our extensive expertise, we create customized implementation strategies to achieve quick and efficient results using SAP best practices. Leveraging our SAP pre-qualified, pre-packaged solution **YASH4HANA**, you can fast-track your ECC to S/4HANA journey.
- **Making SAP run seamlessly on Hyperscalers:** YASH has robust managed services partnerships with all the leading hyperscalers (AWS, Azure, GCP, etc.) & experience helping customers take full advantage of SAP on (any) Cloud.
- **Customized Services:** YASH SAP implementation is consultative, and with the involvement of vertical-functional SMEs and advisory teams, we will tailor SAP solutions to customer needs, develop extensions and integrate with other critical enterprise solutions using SAP BTP – Ensuring that RISE with SAP systems function as you envisage for your environment.
- **Application Management Services (AMS):** Our application management services provide businesses with various solutions with better tactical efficiencies, flexibility, and futuristic strategic capabilities for business transformation and innovation.
