

More than what you think.

'Sustainability' - Strategy, Solutions & Services

Sustainability embodies the enduring pursuit of environmental and social balance, ensuring humanity's long-term coexistence on Earth. Today, the term 'sustainable' resonates across diverse realms, from food packaging and fashion to tourism, reflecting its widespread significance.

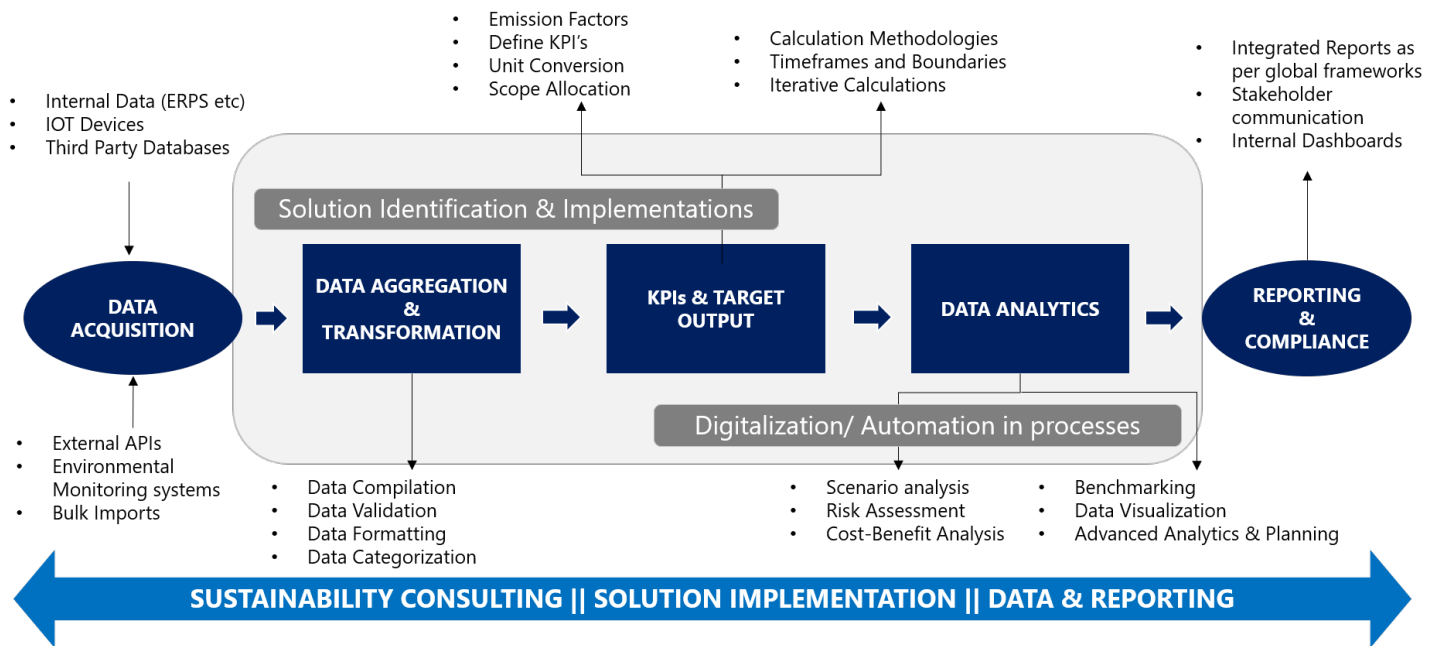

The 'Three Pillars of Sustainability' is a prevalent framework, elucidating the essence of sustainable development. It encompasses environmental, social, and economic facets, all integral to discussions on sustainability. Environmental sustainability underscores responsible resource management, while social sustainability prioritizes inclusive societal structures. Economic sustainability emphasizes prosperity without compromising future generations' welfare.

These pillars illuminate the path to a sustainable future, advocating for a comprehensive approach to align human endeavors with the planet's ecosystems and societal dynamics.

Sustainability KPIs (for holistic ESG Reporting)

Environmental KPIs	Social KPIs	Governance KPIs
Emissions & Energy <ul style="list-style-type: none"> GHG emissions scope 1 GHG emissions scope 2 GHG emissions scope 3 Biogenic emissions Air pollution Energy consumption by source (renewable, non-renewable) 	Employment <ul style="list-style-type: none"> Number of employees by age group Number of employees by gender Board members by gender New hires by age group and gender Employee turnover Retention rate Value chain job creation 	<ul style="list-style-type: none"> Corruption incidents Management anti-corruption training Employee anti-corruption training Business partners anti-corruption training
Water & Biodiversity <ul style="list-style-type: none"> Water consumption Water discharge Water withdrawal Water consumption and withdrawal from high water stress areas Land use Sites leased, managed, or owned in or adjacent to key biodiversity areas 	Payment & Training <ul style="list-style-type: none"> Personnel expense per FTE Entry salary level to local minimum wage Racial pay gap Gender pay gap Training hours for employees Employee engagement index 	Economic KPIs <ul style="list-style-type: none"> Gross Value Added Revenue Operating profit Operating costs Subsidies and investment grants Income taxes Property taxes Payments to capital providers Community investment
Waste <ul style="list-style-type: none"> Hazardous waste Recycled waste Residual waste Single-use plastic consumed 	Health & Safety <ul style="list-style-type: none"> Recordable work-related injuries High-consequence work-related injuries Fatalities resulting from work-related injuries 	

Solution Framework

Key Business Challenges without ESG (Environment, Social, and Governance) Considerations:

- Cybersecurity threats and data privacy concerns
- Operational inefficiencies and cost management
- Supply chain disruptions and risks
- Regulatory compliance and government policies
- Rapid technological changes and disruptions
- Shifting consumer preferences and trends
- Complexities in Global Sustainability Reporting

YASH Differentiators

Over two decades of robust experience in sustainability consulting and implementations

200+ Readily Available skilled Resource Pool (in-house) to support global customers

Strong domain experience across sectors (Manufacturing, Energy, BFSI, Retail, Construction)

Solution Accelerators and rapid deployment solution packages for quick adoption and rollout

Combines in-depth domain, technical & consulting capabilities to address immediate/long-term needs

At the forefront of delivering EHS and Sustainability business outcomes for leading Fortune 500 companies
