

More than what you think.

Empower your Enterprise with SAP Business Technology Platform (BTP) | Enterprise Automation

Process automation had to step into the business milieu when traditional task-oriented automation was no longer sufficient to achieve enterprise digital transformation goals. Here, the need for holistic enhancement of business and IT processes, from identification to seamless execution, became necessary to:

Orchestrate workflows seamlessly across applications & systems for unparalleled organizational efficiency.

Elevate business applications through enhanced & customized processes, aligning technology with your needs.

Overcome the struggle of diverse and disconnected environments in the automation journey.

Identify process bottlenecks, preventing project failures and ensuring success.

SAP has been meeting the escalating demand for seamless automation, an essential element within its visionary innovation initiatives, for years. YASH Technologies, a leading SAP Partner, offers an advanced SAP BTP-based cutting-edge solution package that is all set to redefine the enterprise automation landscape with capabilities to hyper-automate your business processes.

The Essence of Enterprise Automation - Hyper automation & Process Composability

Enterprise Automation combines Hyper automation and Process Composability to comprehensively automate and optimize end-to-end business processes. At the heart of this innovation, SAP Build breaks down complex processes into manageable components, making automation more efficient and scalable.

Solution and Offerings Components

Understanding Complex Processes: SAP Signavio

SAP Enterprise Automation allows comprehensive identification, modeling, and automation of business and IT processes. SAP Signavio is an indispensable platform for gaining profound insights into business processes. It facilitates organizational realignment and expedites change implementation.

SAP Signavio identifies bottlenecks and automation opportunities while maintaining adaptability to changing needs. The platform supports thorough process analysis and mining and excels in process and journey modeling. It establishes robust governance, empowers effective workflow management, and makes it available seamlessly on a single platform.

Within YASH's Enterprise Transformation Suite, the SAP Signavio Process Transformation encompasses critical elements:

Process analysis & mining

Process & journey modeling

Governance establishment

Execution automation

SAP Integration Suite

The SAP Integration Suite, an integration platform-as-a-service (IPaaS), ensures seamless connectivity across SAP and third-party applications. Robust functionality and innovative modular capabilities empower businesses to integrate and manage mission-critical processes across complex landscapes.

The YASH solution combines the capabilities of Signavio, AI, and the SAP Integration Suite to help address clients' needs holistically.

Benefits of the Solution

Continuous Improvement

Utilize SAP Signavio to analyze and benchmark processes against industry best practices, uncover inefficiencies & take informed actions.

Complete Automation

Leverage SAP Build for AI-powered automation and low-code solutions, addressing process inefficiencies swiftly.

Integration

SAP Integration Suite integrates SAP & third-party applications seamlessly, optimizing end-to-end business processes across diverse environments.

YASH as Your Partner

YASH leverages SAP's Enterprise Automation to enhance your business:

- **Expertise:** Our team brings extensive expertise in SAP technologies, ensuring a seamless transition to Enterprise Automation. YASH has a proven track record in helping clients harness the power of BTP and Signavio.
- **Customization:** We understand the uniqueness of your business, offering tailored solutions to meet your specific needs.
- **Client-Centric Approach:** Prioritizing your business goals, we tailor our solutions to align with your objectives.
- **Agile Implementation:** YASH ensures swift and agile implementation, minimizing disruptions and maximizing efficiency.
- **Continuous Support:** Our engagement extends beyond implementation, providing continued support to ensure your success.

Getting Started with Enterprise Automation

Empower your enterprise with SAP BTP | Enterprise Automation by YASH. Integrate, improve, and automate with a partner invested in your success.
