Case Study

ERC Implementation to Author and Release 1000+ SDS in different countries / languages for leading global supplier

About the Customer

- US Headquartered, large Chemical Company
- 30+ plants across 12 countries, 10 languages
- Manufacturing 4000+ products with 50+ Regulatory end users
- Running multiple ERP instances – ECC and multiple Non-SAP systems

Business Challenge

- Challenges in Printing updated Regulatory reports
- No standardized systems and Processes
- Data availability across multiple non-SAP systems
- No updated regulatory data
- Concerns over data validation and accuracy
- No GHS compliant Label templates

How is the Company able to print regulatory reports for authorities

Implemented Solution

- Data Migration from non-SAP systems to SAP systems for global products
- Implement SAP EHS Regulatory Content (SERC) (Property Tree, Phrases, Expert rules, SDS templates
- Created standardized Product safety and Dangerous good data structure /hierarchy
- Created and Updated List and UN list Subs with the latest ERC content
- Aligned WWI SDS Templates as per business requirements
- Designed 24 inventory and ship-to-WWI label templates per business requirements
- Designed special DG report for authorities as per legal requirement
- Created GHS classification report for easy review / validation for business
- Authored 3000+ SDSs in various Languages.
- Created user guides for businesses to understand the SAP process easily

Business Benefits

- Globally standardized EHS system rolled out across 30+ sites in planned timelines
- Centralized EHS data repository for global sites
- Validated regulatory data available in the system to print compliant reports
- Able to print updated SDS and Labels international sites with a button click
- Able to run DG checks and integrate with SD module to print DG data on Shipping documents
- The company can avoid penalties from authorities against non-compliant data and reports
