EmTRACK
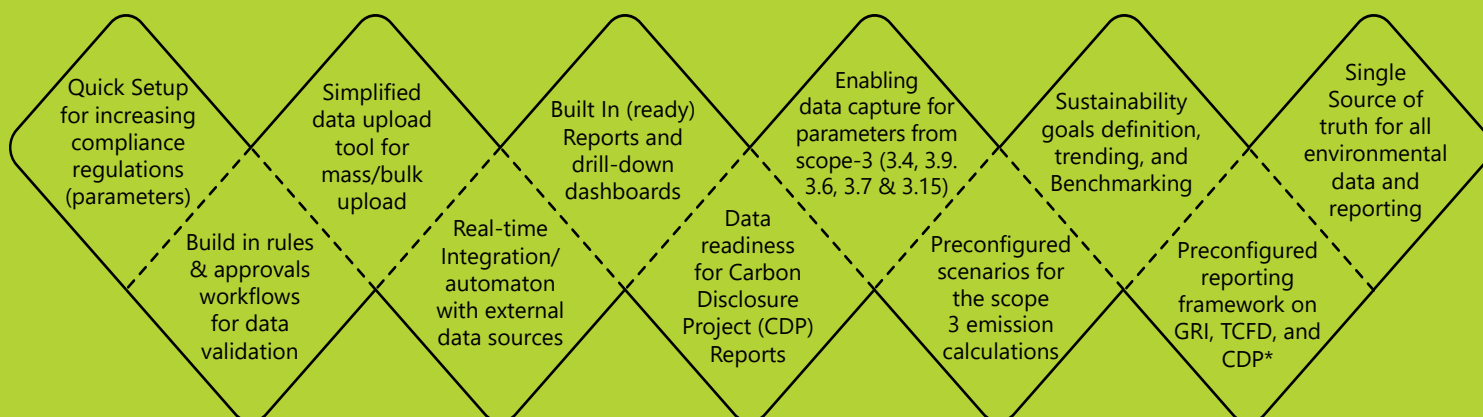

Environment Management (EM) Accelerator

Environmental (Tracking, Reporting, Business Challenges Analytics and Compliance) KPIs

Corporate sustainability & environmental disclosures are increasingly becoming the talk of the houses and board rooms all around. Environment Management (EM) Solutions are gaining popularity as they help organizations define, monitor, and improve their energy efficiency and environmental sustainability. EM helps an organization address its regulatory requirements systematically and cost-effectively to achieve the Net-Zero goals of carbon Neutrality.

Business Challenges

- Disintegrated or Disparate Data Systems
- Complexities in Global Sustainability Reporting
- Tracking and Monitoring Environmental Parameters
- Complying with local regulatory requirements
- Tracking Environmental KPI's and Emission Trends
- Consolidating and Reporting Scope 3 Emissions

Solution Highlights and Scope

- Quick Setup for increasing compliance regulations (parameters)
- Build in rules & approvals workflows for data validation
- Simplified data upload tool for mass/bulk upload
- Real-time Integration/automaton with external data sources
- Built In (ready) Reports and drill-down dashboards
- Data readiness for Carbon Disclosure Project (CDP) Reports
- Enabling data capture for parameters from scope-3 (3.4, 3.9. 3.6, 3.7 & 3.15)
- Preconfigured scenarios for the scope 3 emission calculations
- Sustainability goals definition, trending, and Benchmarking
- Preconfigured reporting framework on GRI, TCFD, and CDP*
- Single Source of truth for all environmental data and reporting

SAP Modules in Scope

- SAP Environment Management
- SAP Analytics (SAC)
- Sustainability Control Tower (SCT)*(on upcoming releases)
- SAP BTP – SPA (SAP Process automation) & Build Apps

Solution Package Specifics

- Solution Available in both Public Cloud and Private Cloud (PCE)
- Fixed scope, timelines, and cost - any variance may call for change order
- Any other external / 3rd party interface may call for additional effort/cost
- Primarily offshore managed project with quick timelines and readiness
- Standard best practices solution framework and ready accelerators

Solution Prerequisites

- Base solution landscape: SAP S/4HANA
- SAP HCM / SF Interface
- Master data

Implementation Time & Cost Estimates

for 1st Primary Site/ Plant

14 Weeks of Implementation
+2 weeks of Hyper care support

Base package starts at *$150,000** for the services cost

Terms and Conditions

- Any licenses & infrastructure (hosting) cost is not included here
- All solution licenses to be procured from SAP directly or through YASH
- Any travel, accommodation, logistics, and misc. cost is separate at actuals

- The cost mentioned is based on the fixed scope for one primary plant/site
- Any rollout for further sites would be additional cost based on the scope
- Any applicable taxes and charges are separate, as per the agreement

About YASH Technologies

YASH Technologies focuses on customer success. As a leading technology services and outsourcing partner for large and fast growing global customers, the company leverages technology and flexible business models to drive innovation and value throughout its customer's enterprise. YASH customer centric engagement and delivery framework integrates specialized domain and consulting capabilities with proprietary methodologies and solution offerings to provision application, infrastructure and end user focused Right-Sourcing services. YASH is a SEI CMMI (Level 5) and an ISO 9001:2015 certified company with U.S. and India headquarters and regional sales and development offices globally with customers spread across 6 continents.
