

Case Study

How Company Improved their CDP score from C- to B-

About the Client

- US Headquartered, large Healthcare company
- 40+ plants across 12 countries, 10 languages
- 25000+ users across with 300+ champions
- Running multiple ERP instances – ECC, S/4, and Non-SAP, with multiple disparate systems
- 3rd party integration – Workday, RegScan, etc.,
- EHS – EM Hub (concept) hosted on Azure cloud

Key Business Challenges

- Challenges in collecting data for various environmental parameters
- No standardized processes
- Data spread across disparate systems.
- Unable to obtain a clear view of the data gaps/ incorrect data
- Limited visibility to the leadership team
- Concerns over data validation and accuracy

Implemented Solution

- Around 20+ parameters were set around factors like Energy, Waste, Emissions, etc.
- Mapping the locations and equipment master form PM/sites: All functional locations
- HR integration accomplished -SAP EHS and Workday for workflows, notification, and 2-way communications
- Unit Conversions and calculations – based on different countries/regions and reporting requirements
- Standardized data collection and validation across all sites as per required frequencies (Weekly/ Monthly/ Yearly)
- Automated workflows, Alerts, and notifications (outlook) to respective stakeholders for timely tracking and updates
- Upper Limits set for monitoring and tracking exceedance
- Configured calculations and equations to get the CO2 emission rate
- Created run book for a quicker/ faster readiness of the following site

Business Benefits

- *Globally standardized EHS system rolled out across 36 sites in record time*
- *Measuring, Monitoring, and Reporting the environmental parameters across global sites*
- *Compliance reports like CDP, OSHA, and injury rate (IR) are available as an output from the system*
- *Integrated dashboards & greater visibility toward building a world-class EHS organization*

Customer Testimonial

Our two-year relationship with YASH team has never seen the hour or day in which they did not live our EHS Vision of Safer Together! Due to their direct and tireless effort, our program has delivered two on-time, on-budget rollouts of the SAP EHS Management system at 36 plants, supporting over 12K employees to bring 30% Reduction in reportable injuries and CDP score from C- to B- within 1st year of implementation".

- Global Director of Environment Health & Safety Management(EHSM)

Large Life Sciences and Medical Equipment Company
